

Company Profile

MAULANA FURNITURE INDONESIA

About Us

At Maulana Furniture Indonesia, we specialize in crafting high-quality wooden houses that blend natural beauty with modern living. With a passion for wood and a commitment to sustainable building, we transform carefully selected timber into warm, durable, and timeless homes.

Our team of skilled artisans and builders combines traditional craftsmanship with innovative techniques to deliver houses that are not only strong and functional but also environmentally friendly. Every detail is thoughtfully designed to create living spaces that feel both elegant and comfortable.

We believe that a home is more than just a structure—it is a reflection of lifestyle, harmony, and connection with nature. That is why we are dedicated to providing our clients with wooden houses that inspire, nurture, and last for generations.

Our Vision

To be a leading innovator in wooden house manufacturing, inspiring sustainable living and creating homes that connect people with nature.

Our Mission

Our Mission is to build wooden houses that reflects the strength and sustainability. Our company use only premium, eco-friendly logs and responsible practices. Offered tailored designs that suit every client's lifestyle, deliver quality and trust through every stage of construction.

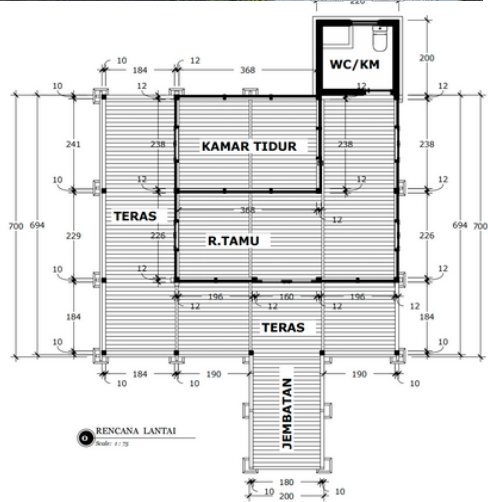

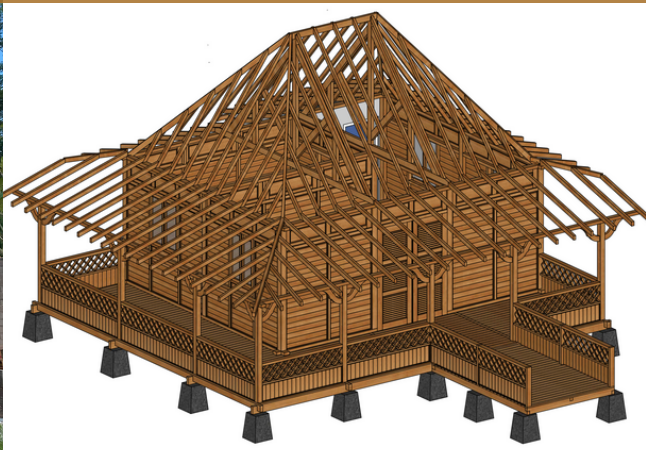

Our Values

- Quality — Every detail matters, from timber selection to finishing.
- Sustainability — Responsible sourcing and eco-friendly production.
- Innovation — Blending natural materials with modern solutions.
- Integrity — Honest, transparent, and committed to excellence.

Our Services

- Custom Wooden House Design — Tailored solutions to match your vision.
- Prefabricated Wooden Homes — Fast, efficient, and flexible builds.
- Resort & Villa Development — Wooden eco-lodges and villas for hospitality.
- Renovation & Maintenance — Restoring and maintaining wooden structures.

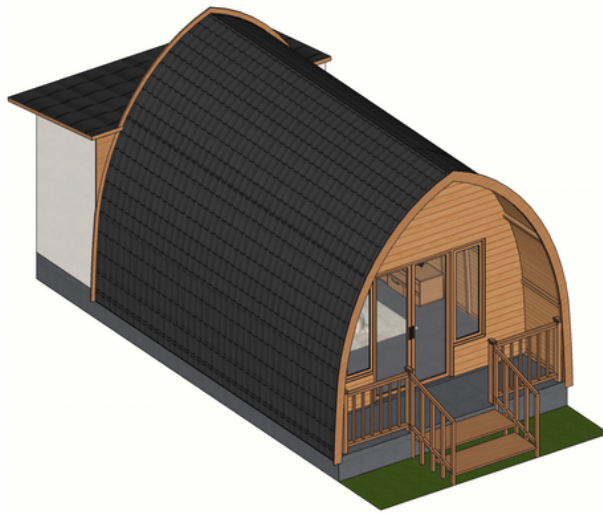

A photograph of a traditional wooden house with a steep, tiled roof and a balcony, situated in a rural setting with trees and a clear blue sky. The house is built on concrete pillars and has a wooden staircase leading to the balcony. The roof is made of reddish-brown tiles and has a decorative ridge. The walls are made of dark wood. The house is surrounded by lush green trees and a clear blue sky. A small white object, possibly a bird, is visible in the sky. The ground in front of the house is dark and appears to be a dirt or gravel area. There are some plants and a small concrete path leading to the house. A stone wall is visible on the right side of the house. The overall scene is peaceful and rural.

Type : Joglo House

Dimension : 7 x 8 meter

PRICE : Rp 175.000.000

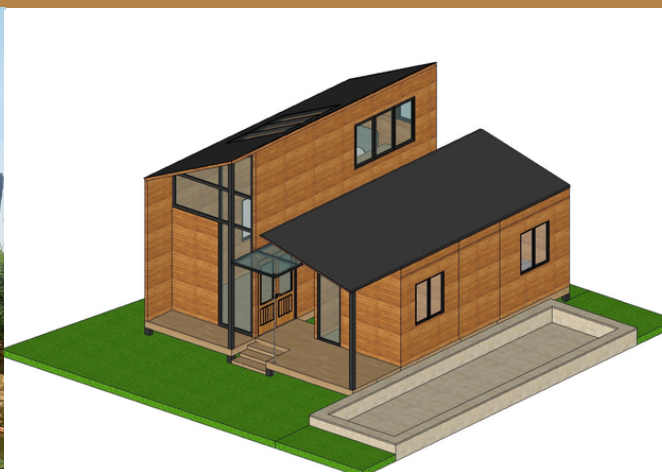

Type : Lumbung House

Dimension : 4 x 6 meter

PRICE : Rp 90.000.000
